Oct 25, 1927. 7 mi. S. of Platteville, Colorado 14

The large maples are in middle of a large
wood. A colony of maple 50 ft. high the
largest 11 inches in diameter, the next 7 1/2 inches.
The others smaller down to saplings.

Many seeds were identified no black ones.
Many apparently Red oak but an exception.
Could find no fruit but the exception
of 2 Red oak acorns.

The ash trees here were all on edge
of woods near road.

Oct 27. Woods Meadow near State

57 specimens are 2 m.

5 mi. S. of Platteville

1937 Quercus Rubra

1938 Quercus bicolor var longifolia 10 m.

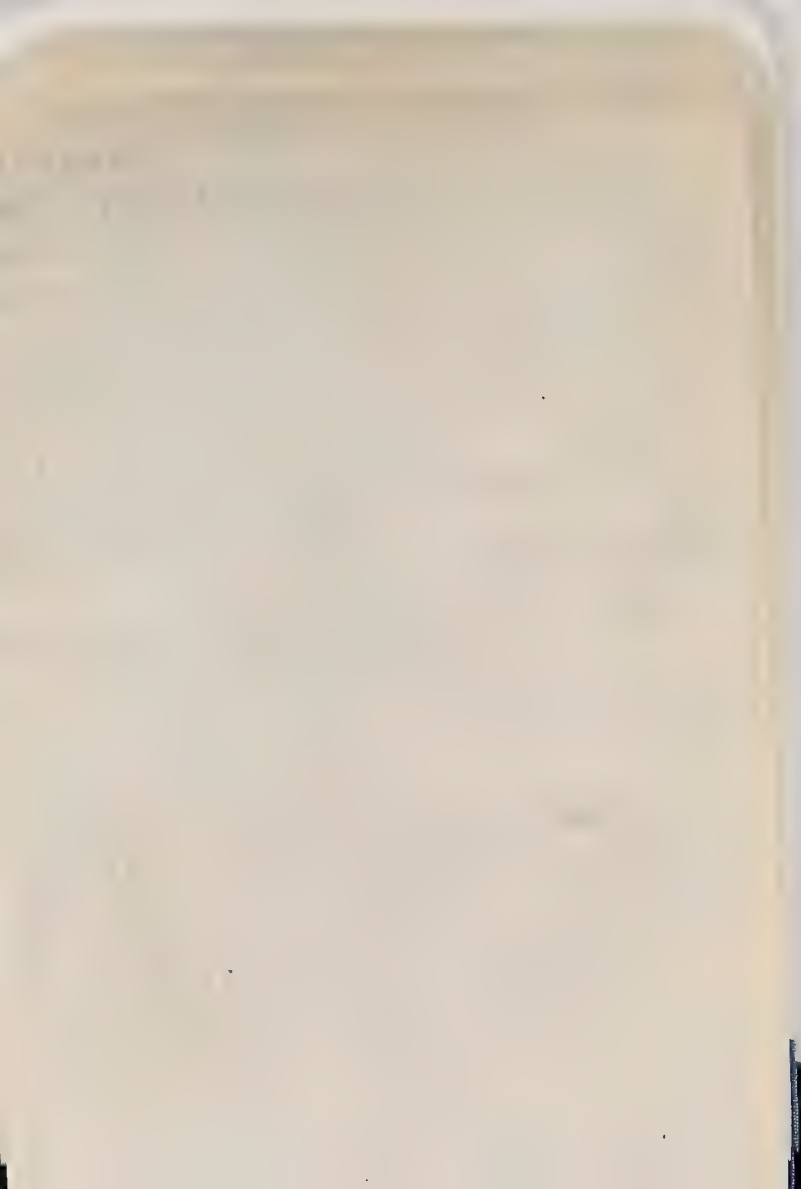

1939 Quercus arbutifolia

1940 Quercus arbutifolia

In this group, some are 10 m. high. Found
1st & 2nd year. Found no black oak.

On road, edge, top, and some are scattered
about woods. Found flowers of Wild Apple

with about all leaves with red & shad
from here.

Oct 28. 1922 Smithtown. Woods at Miller pond 15

1941 *Paricum dichotomum*.

1942 *Quercus velutina*.

Sp. ...

White, Serotous & Black oaks in these woods.
Some scrub & scrub oaks. Some Red
Red or Pin oaks, one post oak.

Gray birch, Red cedar, Patch pine & 2
Small white pine.

In some the fruit is brown the other
is to 100 ft in diameter & 100 ft high
Found no trees (Bogachan) or other
mosses (Casper) that I especially

Woods near gardens in

Nov 9. 1922. Richmond Hill 19

Finding the Fringed Gentian is very interesting as about 50 years ago, a boy, rambling through these or nearby woods at Richmond Hill with my father, we found a single plant of Fringed Gentian in flower, the first I had ever seen.

Nov 2, 1923. Alleg. Rapids & Duane 77

Nov 2. Day 5 of field work.
Red maple in woods in the
white oak area.

Day of ten big open fields woods in the
Piney Point area.

Nov 3 A.M. Rockledge Center E. of Richmond

2815 *Eudora elliptica*

Noted *Andropogon glomeratus*.

Nov 10 Woods near Phyllis

2817 *Pinus strobus*

2818 *Quercus prinus*

2819 *Liquidambar styraciflua*

2820 *Fraxinus americana*

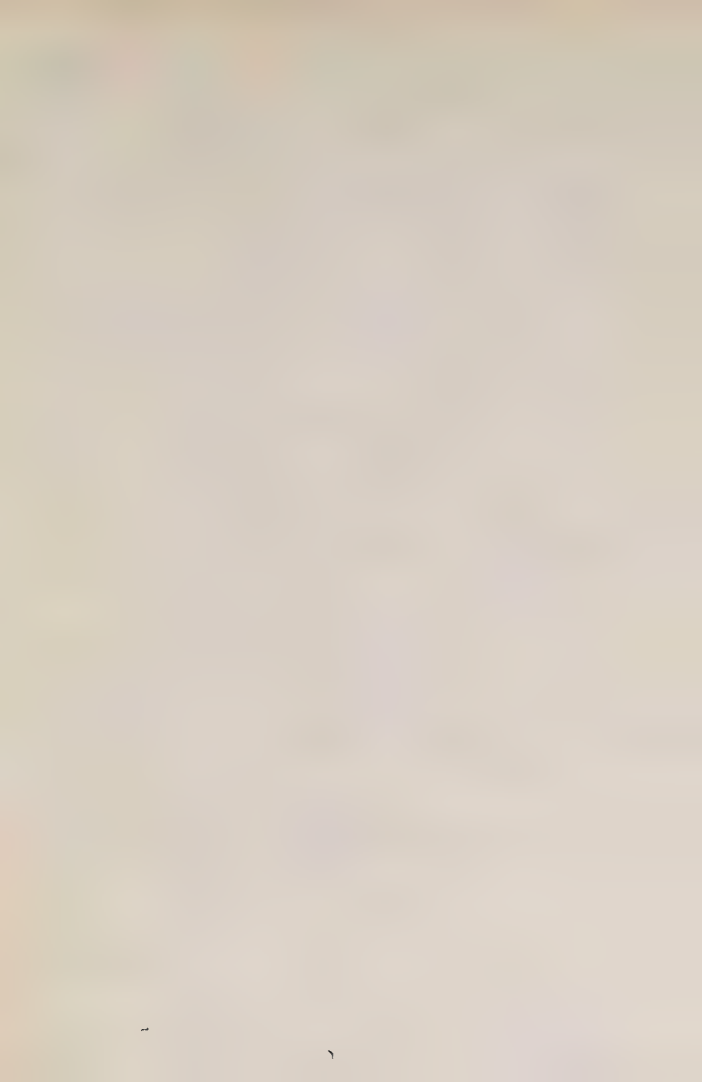

Nov 11. Canopy of young Sugar maples, and other
smaller trees in it is the same as before.

Last year. Old, green ferns in the
undergrowth. Still undisturbed.

Pinus strobus, Quercus prinus, Day of ten

Species & intermediate. *Liquidambar styraciflua*

Heads - 3 or 4 small ones.

Nov 12. 1923 Wooded. Trans. Woods. 78

No forest or sub-woods.

Viburnum lentiginos, leaves & berries.

Phytolacca 12 ft tall.

Nov 13. Hills. Park, from Iron Park to

Wyandland. | Lost in fruit-
Malaxis *unifolia* Woods,
N. W. of Iron Park

2821 *Juncus canadensis*

2822 *Erigeron complanatus*.

Notes: *Erigeron canadensis*, *C. strigosus*,
Erigeron acrostachyoides, *Erigeron sp.*
Erigeron canadensis, *Erigeron strigosus*.

Nov 17. P.M. Phytolacca

Searched for *Saxifraga hypnoides* with
no success. Open 3 or 4 ft. tall.

Nov 19. Hills. E. of Wyandland.

2823 *Erigeron acrostachyoides*

2824 *Erigeron strigosus*

2825 "

2826 *Chimaphila umbellata*

Nov 20. 1923 Freeport.

- 2827 *Vilumium Cassinoides* buds
- 2828 *Clathrus ulmifolius*
- 2829 *Ulex* sp. Sports from old comp.
- 2830 " " 12 ft tall

2831 *Andropogon glomeratus*

No Club-mosses nor ferns seen

Nov 21. Rock Run to Center Lake
through woods along Mtn. Parkway

A single small colony of *Lycopodium*
budding, in old-wood seen.

No *Trichomanes*. Green leaves of *Trichomanes*
arborescens throughout & here & there
Ulex glabra, small plants, & *Mosses*
Cassiope, all in dry soil

I have never yet found *Lycopodium*
trichomanes with fruiting spikes, but
C. complanatum was plentiful &
some 50 ft. high, has three *spores* 77
common. The forest is place covered
largely *oaks*.

Nov 26. 1923 Wye to Central Park 80

2831 *Lycopodium lucidulum* - Fairmount
4 single stems of *Lycopodium lucidulum*
N. of Richmond. 2 small colonies of
L. complanatum N. of Fairmount
3 small colonies of *L. obscurum*.
1 plant *Polystichum acrostichoides*
1 " *Dryopteris spinulosa*

Dec 11. Brentwood to Central Park
along with Parkway. Poor weather.
2832 *Lichum tenuifolium*. NW of Central Park
No other mosses seen & but 1 fern,
Dryopteris spinulosa, a single plant.

Dec 7. N.W. of Plattsdale. woods.

2833 *Hedera polycarpa*
2834 *Bolichium dissectum*

Notes 2 plants of *Bolichium dissectum*
3 or 4 colonies of *Lycopodium lucidulum* &
L. complanatum. Several of *Dryopteris*
spinulosa & 1 of *Polystichum acrostichoides*

Dec 8. 1923 Brentwood to Wyandanch

Along Motor Parkway.

2835 *E. obscurum* *Complanatum* *Stellaria*

2836 " " "

2837

A few Small River Stones in woods
N.W. of Brentwood.

E. obscurum *Complanatum* grows luxuriantly
in these woods.

Thickets along of *E. obscurum*. 2 to 3
thousand plants, all large.

Have never seen such large plants or
such a large colony before.

1924

Compared to house with *Complanatum*
all of January

Feb 2 Woods *Populus alba* 10 ft
tall Catkins protruding from buds 1/4 in.
